Comments: .

Is the evaluated use attainable? ☒ Yes ☐ No

Comments: The UAA was conducted in July 2005 and no WBCR was observed. The stream met the maximum depth criteria at 1 of 6 sites and the average depth criteria at 1 of 6 sites evaluated. An additional site was close to meeting the criteria. No interview was conducted. Because the stream had several pools that likely have a swimmable depth at some point during the recreational season, the committee recommends retaining the WBCR designation.

**Committee Recommendation:** ☒ Retain Use ☐ Modify Use ☐ Remove Use ☐ Inconclusive
